23 August, Thursday

Registration 10:00-13:00, 17:00-20:00 (A room 1224)

24 August, Friday

9:00-9:15	Openning of the Conference	
9:15-10:00	*A.V. Arhangelskii,* On σ-compact groups and their mappings	
10:05-10:50	*J. Revalski,* Variational principles in optimization and topological games	
	Coffee Break (Registration) (A room 1224)	
11:20-11:45	*D. Chodounsky*, P-points, Silver reals, and Isbell's problem	*E. Shchepin*, On homeomorphisms of zero-dimensional compacta
11:45-12:10	*D. Saveliev*, Idempotent ultrafilters are not selective	*S. Hernández,* When a totally bounded group topology is the Bohr Topology of a LCA group
12:10-12:35	*A. Starosolski*, The Rudin-Keisler ordering of P-points under **b** =**c**	*E. Martyanov*, R-factorizable G-spaces
12:35-13:00	*O. Sipacheva*, Arrow ultrafilters and topological groups	*Peng Liang-Xue*, Subgroups of products of certain paratopological (semitopological) groups
	Lunch	
14:30-15:15	*Shou Lin,* Fifty years of Mappings and Spaces	
15:20-16:05	*D. Shakhmato*v, Weak α-favourability in topological spaces and groups	
	Coffee Break (Registration) (room A 1224)	
16:30-16:55	*L. Kočinac*, Some results in selection principles theory	*L. Auβenhofer,* On the Mackey topology on abelian topological groups
16:55-17:20	*T. Fomenko*, Fixed points and coincidences of mappings and mapping families in ordered sets	*Y. Maksyuta*, 2-homeomorphisms and nonhomogeneity level
17:20-17:45	*S. Tokgöz*, Some results on paracompact remainders	*M.J. Chasco*, On g-barrelled groups
17:45-18:10	*I. Leibo*, On the dimension of some semi-metric spaces	*P. Sharm*a, Duality in topological and convergence groups
18:15-19:00	*V. Filippov,* Понимание топологии / Understanding topology / (in Russian)	

25 August, Saturday

9:00-9:45	*W. Marciszewski*, On factorization properties of function spaces
9:50-10:35	*I. Juhasz*, On the tightness of G_δ-modifications
	Coffee Break (A room 1224)

11:00-11:25	*A. Bella*, On a game-theoretic version of Arhangel'skii's inequality	*S. Gulko*, On the classification of spaces Cp(X), where X is a countable metric space
11:25-11:50	*P. Semenov*, Inner points and exact Milyutin mappings	*A. Osipov*, The spaces C(X): decomposition into a countable union of bounded subspaces
11:50-12:15	*V. Todorov*, Some remarks about Alexandroff's hypothesis concerning V^p - continua	*O. Pavlov*, q-equivalent not t-equivalent spaces
12:15-12:40	*A.Borubaev*, Uniform analogues of feathered spaces and perfect maps	*L. Genze*, Topological classification of spaces of Baire finite-valued functions (in Russian)
12:45-13:30	*M. Choban*, Conditions of finitness, open mappings and classes of spaces	
	Lunch	
16:00-17:15	Excursion to the cathedral of Christ the Savior and its observation deck	

28 August, Sunday

Conference Dinner 18:00

27 August, Monday

9:00-9:45	*M. Sakai*, The Menger property of Cp(X, 2) and related matters	
9:50-10:35	*P. Kenderov*, Fragmentability of topological spaces	
	Coffee Break (A room 1224)	
11:00-11:25	*A. Błaszczyk*, Some constructions involving inverse limits	*D. Baturov*, On dense subspaces of iterated function spaces
11:25-11:50	*Li Jinjin*, Minimal base for finite topological space by matrix method	*E. Sukhacheva*, On space of continuous functions given on certain modifications of linearly ordered spaces
11:50-12:15	*A. Ivanov*, Almost fully closed mappings and quasi-F-compacta	*D. Korolev*, On some topological property of a space Cp(X,S), where S is the Sorgenfrey line
12:15-12:40	*Al Shumrani Mohammed Ahmed*, Compact Complement Topologies and a characterization theorem for k-spaces	*A. Bogomolov*, Paranormality of subsets of function spaces (in Russian)
12:40-13:05	*Wei Chen*, On semiconic idempotent commutative residuated lattices	*T. Khmyleva*, On linear homeomorphisms of spaces of continuous functions defined on scattered compacta with the topology of pointwise convergence on everywhere dense subsets (in Russian)
	Lunch	
14:30-15:15	*F. Tall*, Applications of Cp-theory to Model Theory	
15:20-16:05	*V. Valov*, Spectral representations of topological groups and near-openly generated groups	
	Coffee Break (A room 1224)	
16:30-16:55	*G. Dimov*, Extensions of dualities and a new approach to Fedorchuk's duality	*Lin Fucai*, The k_R-property of free Abelian topological groups and products of sequential fans
16:55-17:20	*Li Changqing*, On some topological properties of the Hausdorff fuzzy metric spaces	*A. Leiderman*, On embedding of free abelian topological group A(X+X) into A(X)
17:20-17:45	*E. Ivanova-Dimova*, Vietoris-type Topologies on Hyperspaces	*I. Sánchez*, Quotients of topological groups
17:45-18:10	*A. Taherifar*, Some new classes of ideals of C(X) and λX	*Liu Chuan*, Notes on free topological vector spaces
18:10-18:35	*A. Lipin*, The omega-resolvability at a point of pseudocompact spaces	*R. Beshimov*, Some cardinal properties of functors of finite degree

28 August, Tuesday

Time		
9:00-9:45	*M. Hušek*, Factorizations of maps on limits of inverse systems	
9:50-10:35	*Jan van Mill*, Some aspects of dimension theory for topological groups	
	Coffee Break (A room 1224)	
11:00-11:25	*S. Medvedev*, F_σ-mappings between perfectly paracompact spaces	*S.Bogatyi*, On topological groups (in Russian, slides in Eglish)
11:25-11:50	*A. Chekeev*, Complete normal bases (in Russian, slides in Eglish)	O. Frolkina, An Antoine Necklace in R^3 all whose projections are 1-dimensional
11:50-12:15	*A. Gryzlov*, On embedding of spaces into Tychonoff products	*E. Mychka*, On the continuous dependence of solutions on the parameter of the right-hand side under conditions of the Caratheodory-Plisch-Davy type (in Russian)
12:15-12:40	*A. Kombarov*, Properties of normality type outside the diagonal (in Russian)	*E. Reznichenko*, On homogeneous spaces
12:45-13:30	*M. Tkachenko*, Gaps in lattices of topological group topologies	
13:30-13:45	Closing of the Conference
